

Cat. No. 06808

OPTI - KIT

This Fibre Optic Preparation Set contains a complete range of special purpose tools designed specially for the preparation of single and multi mode optical fibres and cables ranging from micro coatings to reinforced loose tube constructions.

The kit is ideal for both field and laboratory use and contains:

- **Split Strip** - For the removal of Kevlar protective sleeve.
- **Opti Strip** - For stripping the secondary coatings from optic fibres.
- **Silica Strip** - For the removal of primary coatings from fibre optic leads.
- **Precision Cutters** and screw drivers included.

Technical Specifications

Capacity:

Stripping:

Kevlar protective sleeve 2.5 to 6.5mm dia.

Fibre Optic leads from 0 - 3000 micron.

P.T.F.E. coated wires 0.5 - 3.0 mm dia.

Comes in a handy carry case containing:

Opti Strip - Cat. 06805

Split Strip - Cat. 06806

Silica Strip - Cat.06807

Precision Cutters.

Case Dimensions: 295 x 200 x 50mm.

Kevlar is registered trademark of DuPont
